

Automated hands free eco taps

Help to control the spread of COVID-19 and other illnesses in the work place. Eco taps mean less contact with surfaces reducing the opportunity for viruses and bacteria to settle on the surface

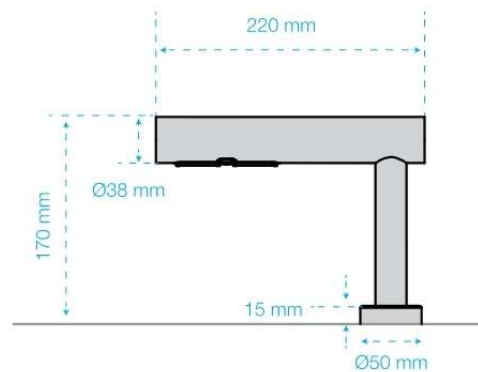

- Soap dispenser
- Water dispenser, available directly off the mains or heated via an under-sink heater
- High speed hand dryer
- Brushless motors for long lasting service life
- Tap manufactured using high grade stainless steel

Wall mounted

The system has the ability to be mounted directly into the wall or onto the sink itself

Sink mounted

Above is an example of a typical instalment of the sink mounted unit.

Ideal for Airports, Schools, Sports halls, Motorway Stations, Hotels, Restaurants, Nursing homes and many more applications with large amounts of foot traffic
